## FOR IMMEDIATE RELEASE

### Terminal Security Solutions and NeuralGuard Unveil AI-Driven EyeFox for Next-Gen Cruise Security

**Hollywood, FL – January 13, 2025** – Terminal Security Solutions (TSS), a leading provider of security for the maritime industry, proudly announces its exclusive partnership with NeuralGuard, a dynamic AI technology firm specializing in security screening solutions. This strategic collaboration marks a pivotal moment in cruise security, as TSS prepares to introduce cutting-edge AI auto-threat detection software, EyeFox, to the cruise industry.

EyeFox revolutionizes X-ray security screening with automated threat detection at exceptional accuracy levels, streamlining operations, reducing passenger contact, substantially increasing the detection rates of prohibited items, and improving overall on-board safety. After undergoing months of testing of the EyeFox technology in a live operational environment and adjusting to the unique requirements of the cruise industry, TSS has begun rolling out EyeFox in multiple locations, providing enhanced security to its customers.

"There has been minimal innovation in the cruise terminal security operation over the last several decades," says Mike Lee of TSS. "This collaboration marks a significant step forward in the space. EyeFox will greatly enhance safety and security standards all while improving operational efficiencies."

Powered by NeuralGuard's cutting-edge AI algorithms, EyeFox adapts swiftly to evolving threats, ensuring cruise lines stay ahead of potential risks. The partnership aims to elevate safety and passenger experience across the industry.

"NeuralGuard is proud to bring our AI-driven security technology to the cruise industry through this partnership with TSS," said Moshe Cohen, President of NeuralGuard. "EyeFox demonstrates the immense potential of artificial intelligence in addressing complex security challenges, offering both unprecedented accuracy and adaptability. Together, we are setting a new standard for security excellence in the maritime sector."

*NeuralGuard is a dynamic technology company specializing in Artificial Intelligence-based auto-detection solutions for the security screening market. Established on the strong foundations of the Renful Group, Neural Guard combines cutting-edge technology with over 25 years of experience in X-ray screening software and security expertise. With a global reach spanning over 80 countries, the company leverages diverse data and on-the-ground security screening knowledge to provide comprehensive solutions that ensure safer environments, lower operational costs, and improved customer experiences.*
